

Seeds for 2020 Growing Season

Seed Company		Fruit/Veg	Description
Gurneys		Asparagus Jersey Knight Hybrid 2-yr. plants	Top-size green spears with feisty purple tips! Jersey Knight is 99.5% male seeds, so you can count of larger, more profuse spears than ever from this ultra-vigorous performer! The spears are top-size -- a full 5/8-inch in diameter and are bright green with deep purple tips.
Park Seed		Beans Cobra Pole	80 days from direct sowing. Continuous Harvests from this French Climber! Stringless, smooth, and sweetly delicious! Round pods reaching 7 inches long. (Actually, they will grow longer than that, but pick them at 7 inches for best flavor and to encourage another fruit set.) The flavor is tender, sweet, and utterly addictive.
Park Seed		Beans Blue Lake Bush	55 days from direct sowing. The Classic--Heavy-Yielding, Plump, and Tender! This is the bush bean by which all others are judged, a classic favorite for many years among gardeners across the U.S. The secret? --Huge yields, great taste, and reliability.
Park Seed		Beans Bush Maxibel	59 days from direct sowing. This is the elegant bean you see in European-style restaurants. As easy to grow as other snaps, Maxibel arises on tall, erect plants that harvest easily.
Park Seed		Beet Detroit Dark Red	60 days from direct sowing. These mid-sized (up to 3 inches in diameter) roots are tender and sweet, with a smooth, round shape and fine-grained texture. The tops reach about a foot high, and make excellent greens -- cut them sparingly as they grow, and you will always have a handful ready for the evening meal!
Park Seed		Beet Rainbow Mix	50 to 55 days from direct-sowing. Grow these superb beets as gourmet babies or as full-sized roots bursting with flavor! And don't forget those nutritious beet greens, which reach their peak at about 5 to 6 inches high. 5 varieties in this collection: Subeto, Boldor, Chioggia, Albina Vereduna, and Bull's Blood Scarletta.
Gurneys		Beet Ruby Queen	52 days from direct sowing. Ruby Queen's round, smooth-skinned beets are exceptionally tender with an earthy beet flavor. Ringless and deep red—they retain their color when canned or pickled.
Park Seed		Cantaloupe-Park Whopper	77 days from setting out transplants or 91 days for direct sow. Now you can grow enormous 6- to 8-pound melons with great flesh firmness and a juicy-sweet taste -- no matter where you live!

<u>Burpee</u>		Carrots Nantes Half Long	70 days from direct sowing. Easy to grow and full of vitamins. Nantes Half Long has slim, cylindrical, orange roots that are 7" long, 1 1/2" thick. It's been proven tops for productivity, delicious flavor and wide adaptability.
<u>Park Seed</u>		Carrots Romance	75 days from direct sowing. Destined to be your favorite carrot in the garden, Romance Hybrid is a joy to grow, harvest, and especially eat! This Nantes type is ready more quickly than many other full-size varieties, and it offers wonderfully straight, blunt-ended roots of bright orange with almost no core and plenty of crisp, ultra-sweet flavor.
<u>Gurneys</u>		Carrots Tendersweet	75 days from direct sowing. Sweetest carrot on the market! Tapered 7-in. coreless roots. Tendersweet Hybrid is a joy to grow, harvest, and especially eat! This Nantes type is ready more quickly than many other full-size varieties, and it offers wonderfully straight, blunt-ended roots of bright orange with almost no core and plenty of crisp, ultra-sweet flavor.
<u>Burpee</u>		Cucumber Early Pride	55 days 8-9" cukes; bears huge crops of gorgeous English cucumbers. This Burpee bred cucumber is proven tops for productivity, flavor and wide adaptability. It bears huge crops of gorgeous cukes. Harvest starts early and keeps on producing for many weeks. Dark green fruits are 8 1/2" by 2" with crisp, juicy flesh.
<u>Park Seed</u>		Cucumber Garden Sweet Burpless	55 days 10-12" cukes are smooth, deep green, and absolutely delicious. Burpless cucumbers with delectable flavor <i>and</i> huge yields.
<u>Seed Savers</u>		Eggplant Diamond	70 days from transplanting. Enjoy a bumper crop of 8-in. glossy purple fruit with sweet, mild white flesh. Strong plants are tolerant of heat, drought and disease, making Eclipse a breeze to grow in the home garden. Our favorite variety for Eggplant Parmesan!
<u>Park Seed</u>		Kale Black Magic	60 days from direct sowing. Great for "baby kale," frying into chips, or sautéing the mature leaves!
<u>Burpee</u>		Kale Dwarf Blue-Curled Vates	55 days from direct sowing. One of the most attractive of all vegetables in the fall garden. Low, compact plants with finely curled, bluish-green leaves. Usually stands winter weather with some protection. Good cooked or fresh in salads. Grows best in cool weather. Can be grown as a spring or fall crop. Harvest all winter to zone 6.
<u>Park Seed</u>		Kale Prizm	40 days to maturity. Harvests Early and Continuously! Tender bite, nutty flavor -- these curled leaves are packed with goodness!

True Leaf Market		Kale Red Russian	<p>55-60 days from direct sowing.</p> <p>Red Russian Kale is also known commonly as Ragged Jack, like most other kales, is highly nutritious and great for salads. It gets its name from its origins in Siberia. Red Russian Kale is medium sized and more tender than other kale varieties. It has a mild sweet flavor and is great for salads, especially as a baby green. Will over-winter when planted in late fall.</p>
Park Seed		Kale Redbor Hybrid Purple	<p>65 days from direct sowing.</p> <p>Finely curled, deep red leaves are sweet and tender.</p>
Burpee		Lettuce Black-Seeded Simpson	<p>45 days to maturity.</p> <p>Hugely popular for over 150 years, it's one of the most tender and delicately flavored leaf lettuces ever bred. The ruffled leaves are large with an appealing green color.</p>
Burpee		Lettuce EZ Serve	<p>45 days to maturity.</p> <p>Easy to harvest, prepare and plate. One quick snap at the base of the head and individual salad-sized leaves simply fall apart and into line-instantly ready for a quick rinse and plate presentation.</p>
True Leaf Market		Lettuce Freckles	<p>50-70 days to maturity.</p> <p>The Freckles thrives in full sun or partial shade, and can be grown in zones 3-12. The leaves of the Freckles have a mildly sweet flavor.</p>
Burpee		Lettuce Green Ice	<p>45 days to maturity.</p> <p>Green Ice is Burpee bred and still the sweetest lettuce in our trials. Gorgeous texture too. Large clusters of rich green, ruffled leaves.</p>
True Leaf Market		Lettuce Red Sails	<p>45 days to maturity.</p> <p>The leaves of the Red Sails have a mildly sweet flavor.</p>
Seed Savers		Okra – Star of David	<p>60-75 days from transplant.</p> <p>Organic; plants grow to 9 feet tall and have purple coloration on leaves. Best harvested when pods are 3 inches long. This variety will grow well in most regions of the United States but tolerates HEAT well.</p>
Dixondale Farms		Onions Candy Sweet	<p>90-100 days to harvest.</p> <p>The most popular and recommended variety we offer is Candy! This onion is great for anyone that has never had much success growing onions. Candy onion plants are so easy to grow due to their strong root system and disease resistance.</p>

Dixondale Farms		Onions Red Candy Apple	85-95 days to harvest. It is the sweetest onion variety available. Contains a higher concentration of quercetins, an antioxidant compound that helps delay or slow damage to the cells and tissue of the body.
Dixondale Farms		Onions 1015Y TX SuperSweet	115 days to harvest (up to 6" diameter). They have an off-white flesh and are very sweet and flavorful, excellent for salads, slices, grilling, and cooking. 1015Y Texas Super Sweet Onions are known for their great flavor and large size, disease resistance, and very little pyruvate (which is that substance in onions that makes you cry like a baby).
Seed Savers		Pak Choi Prize Choy	45-50 days from direct sowing. Beautiful upright pak choi with succulent white stems and lush green leaves. This strain is especially uniform, vigorous, and bolt resistant. Delicious mild flavor. Excellent in stir-fries.
Park Seed		Pak Choi Purple	30 days from direct sowing for baby veggies; 45 days for a succulent young plant; 70 days for fully mature pak choi. The only pak choi you need, no matter how you intend to cook this delicious and versatile vegetable! Purple Hybrid is often grown just for its handsome violet leaves, so stunning above lime-green stems, or for its rich, intense flavor.
Burpee		Parsnip Hollow Crown	105 days from direct sowing. HEIRLOOM. Mild, white flesh is fine-grained. This parsnip develops a sweet, nutty flavor after frost. Mature roots are 12" long and 3" thick. Does best in deeply prepared soil.
True Leaf Market		Pepper Hot Jalapeno` Early	65 days from transplanting. The peppers are dark-green to red, 3-inch peppers taper to a rounded tip.
Burpee		Pepper Sweet Big Daddy Yellow	73 days from transplanting. Think big. These huge 8-10" sweet Marconi peppers are glossy golden yellow, thick-walled and crispy sweet. Try roasting with red peppers for a bright and beautiful combo. The strong 18-24" plants hold the hefty fruits high for easy pepper picking. A winner every way you look at it.
Park Seed		Pepper Sweet Cabernet Red	71 days from transplanting. Sweet! Lamuyo-type pepper's thick-walled fruits are 8" long x 6" wide and ripen from green to red. Highly productive plants produce oodles of slightly elongated fruit. Easy-growing, low maintenance.
True Leaf Market		Pepper Sweet Golden Cal Wonder Bell	75 days from transplanting. Glowing yellow bells reach 4½ inches long and wide, with thick walls and juicy, crisp texture. Packed with vitamin C and more flavor than you will ever find in store-bought bells.

Park Seed		Pepper Sweet Karma Red Bell	<p>68 days from transplanting.</p> <p>Fruit - 4" wide 6" long; scrumptious juicy, sweet flavor with no aftertaste!</p>
Gurneys		Pepper Sweet Thunderbolt Red	<p>65 days from transplanting.</p> <p>A sweet pepper dream come true! One great big beautiful sweet Marconi pepper, the largest we offer, and a marvel for flavor and texture. Prolific plants produce plentiful yields of tapered 13" beauties that transition from green to red.</p>
Park Seed		Radish Annabel	<p>26 days to maturity.</p> <p>For high-quality flavor and unbeatable plate appeal, Annabel Hybrid is the radish you've got to try! This European variety offers big, perfectly round, watermelon-red globes filled with white flesh, a strong peppery aroma, and a great bite!</p>
Park Seed		Radish Gourmet Collection	<p>Starburst - 60 days. A Chinese variety with roots as big as tangerines and as bright red (within the creamy white skin) as watermelons! Great for pickling as well as fresh eating, they reach 2 to 2½ in diameter, maturing slowly. Very disease resistant.</p> <p>French Breakfast - 27 days. A unique carrot-like shape and rosy-pink color accented with a white tip! Gourmet mild-tasting, sweet, crisp bite. Matures very early and demonstrates thick, lush foliage.</p> <p>Roxanne 27 days. AAS Winner. Charming little round 1½-inch fruits are ready to eat in less than 3 weeks, but will hold a long time with no loss of flavor! Adaptable to a huge range of climates, this is the tastiest and most garden-worthy radish yet!</p>
Park Seed		Radish Parks Beauty Blend	<p>22-32 days from direct sowing.</p> <p>Variety includes a round, scarlet beauty, ¾ inches in diameter and packed with a spicy, crisp bite. Ready in just over 3 weeks from sowing the seed, it's always the brightest thing on the plate! A rich purple beauty, 1½ inches in diameter and rounded, with a mellow flavor. Harvests 4 weeks from sowing. A pastel-pink variety, round and smooth, about 1½ inches in diameter. Strong green tops complement the delicious roots. Ready in just under 4 weeks. A pure white, round radish with 1¾-inch-diameter globes on vigorous plants. Best harvested at about 30 days. A bright yellow heirloom variety, somewhat oblong, ready in just 3 weeks or so and very strongly flavored.</p>
Park Seed		Radish Patricia	<p>27 days from direct sowing.</p> <p>French breakfast variety displays a unique rosy-pink color accented with a white tip and delights the palate with its mild-tasting, sweet, crisp flesh.</p>
Home Depot		Spinach Bloomsdale Long-standing	<p>46 days from direct sowing.</p> <p>Bloomsdale has been grown by generations of gardeners for its rich flavor and texture. This highly nutritious longstanding spinach is a favorite across the country, and we are pleased to make it available to you again this season, now from Certified Organic seed!</p>
Park Seed		Spinach Palco	<p>38 days from direct sowing.</p> <p>Palco sets smooth mid-green leaves with the traditional rounded, spoon-like shape.</p>

True Leaf Market		Squash Yellow Early Prolific	48 days from transplanting. Early, with rich yellow-squash flavor and very high yielding. Summer squash and zucchini ripen early and are highly productive. The bush type plants take little space and produces 7-8" fruit.
Park Seed		Squash Tivoli Spaghetti	98 days for direct sowing. An All-America selection. Short-vined, compact 4-lb. variety is ready to join you on the patio and bask in a container. High-yielder plentifully produces fruit that's 8-10" long at maturity-packed with delectable, creamy flesh. Fruits may be stored for early winter use.
Burpee		Zucchini Fordhook	55 days from transplanting. Fordhook Zucchini has cylindrical, smooth, dark green, straight to slightly curves fruits with creamy white, tender flesh. The bush-like plants are vigorous and the fruits are best when 6-8" long.
Park Seed		Zucchini Spineless Beauty	38 days from transplanting. 8" long x 1-1/2" wide; Spineless Beauty Hybrid offers excellent yields of uniform, medium green fruit on open plants with very few spines.
David's		Zucchini Tigress	50 days from transplanting. 6-8" fruit; attractive fruits are a flecked medium green and cylindrical. High yielding open plants with moderate spines.
Burpee		Tomato 4th of July Early Indeterminate	71 days from transplanting. 4-6 oz fruits; the first tomato to ripen by Independence Day. Celebrate the Fourth of July with a plentiful harvest of vine-ripened red, luscious tomatoes. The indeterminate plants produce plentiful 4 oz. tomatoes all season long.
Burpee		Tomato Better Boy Indeterminate	72 days from transplanting. 16 oz fruits; large, delicious, bright red, high yielding fruits are borne in abundance starting midseason and continuing to frost. Good foliage protection prevents sun scald.
Burpee		Tomato Big Daddy Hybrid Indeterminate	78 days after transplanting. Fruit 15 oz avg; bred from the all-time great Big Boy with improved disease resistance.
Burpee		Tomato Rutgers Indeterminate	74 days from transplanting. 4-6 oz fruit; the legendary Jersey tomato, introduced in 1934, is a cross between J.T.D. (an old New Jersey variety from the Campbell Soup Co.) and Marglobe. Its flavor, both for slicing and cooking, is still unequaled. Red fruits are slightly flattened. Tall vines, Fusarium resistance.

<u>Burpee</u>		Tomato Super Sauce Hybrid Indeterminate	70 days from transplanting. Fruit Avg 22-32 oz; Super Sauce also makes a great salad tomato; it's perfect for a meaty and tasty hamburger slice too. Indeterminate, disease-free plants yield a summer-long supply of the exquisitely flavored marinara, tomato gravy or meat sauce plus plenty for salads and slicing.
<u>Park Seed</u>		Tomato Sweet Hearts Grape Indeterminate	60 days from transplanting. America's Favorite Grape Tomato! High sugar content and pliable skin make for a really delicious bite!
<u>Burpee</u>		Tomato Sweet Seedless Hybrid Indeterminate	68-70 days after transplanting. Fruit 8-10 oz; world's first seedless tomato, and because there are no seeds, all the sweetness goes into the fruit itself and is immediately available for you to enjoy in every rich slice.
<u>Burpee</u>		Tomato Sweet Tangerine Hybrid Determinate	68 days from transplanting. These delectable tomatoes ripen early for so large a fruit. This Burpee exclusive features clean, bushy, plants that are quite disease resistant and set very heavy crops. Even in hot weather watch for Tangerine to be ready for harvest in about 68 days.
